POSITION DATA

JOB TITLE: Senior Manager of IT Support  
DEPARTMENT: IT (Information Technology)  
REPORTS TO: Director of Network Operations & Security

POSITION OVERVIEW
The Senior Manager of IT Support will lead the ongoing technology support operations of the organization’s information technology infrastructure. This will include the management, administration, and monitoring of all business systems with the goal of system uptime, reliability, and security in support of business and Memorial Museum operations 365 days of the year. This includes ensuring that there is ample and proper business and operations 7 days a week. The Senior Manager of IT Support will also ensure reliable and efficient user support. The Senior Manager of IT Support assists in the planning and implementation of additions, deletions and major modifications to the IT infrastructure organization-wide while insuring minimal downtime and user impact.

The Senior Manager of IT Support must be able to prioritize the work of the support team to ensure maximum efficiency of the support operations. The Senior Manager of IT Support will be the first line of support for any major technology disruptions that adversely affects the business, and must be a team player to ensure that problems are properly assigned to the proper support personnel even beyond the helpdesk team.

This position requires that the individual have a deep and thorough understanding of wired and wireless networking, mobile device management, server systems, and client/server and web applications. The Senior Manager of IT Support must be able to deal directly with senior management and coordinate with the wider IT team on all policy and procedure implementation, making recommendations as and when necessary. This individual must have experience managing vendor support agreements, and communicating with vendors to ensure full and proper product support. The successful candidate must confront issues openly and quickly.

ESSENTIAL FUNCTIONS

- Ensures the successful operation of the corporate helpdesk including incident management and reporting, adheres to service level agreements (SLAs), and interfacing with management across all levels, setting and fulfilling outstanding customer service expectations, timely communications, root-cause analysis, performance and process improvement and frequent statistical performance monitoring and reporting.
